Homework — 1.2.3 Software Development

Name: ____ Date: _ ***Mark:*** ___ / 20

OCR H446 — set after the 1.2.3 lesson. Show your working.

Part A — This week's topic (~14 marks)

1. State, in the correct order, the five main stages of the software development lifecycle. **[2]** *(AO1)*

2. Describe **two** activities carried out during the **Analysis** stage. **[2]** *(AO1)*

3. Extreme Programming (XP) is an Agile approach. Describe **two** practices that are characteristic of XP, and state **one** type of project for which XP is well suited. **[3]** *(AO1 / AO2)*

4. A program accepts a percentage mark that must be between 0 and 100 inclusive. Give one example of **boundary**, **normal (valid)** and **erroneous** test data for this input, and explain why boundary testing is especially important here. **[4]** *(AO2)*

5. During the **Evaluation** stage a finished system is judged against the original requirements. State **three** criteria (qualities) against which the system should be evaluated. **[3]** *(AO1)*

Part B — Retrieval: keep it fresh (~6 marks)

6. *(from 1.2.2)* State **two** differences between a **compiler** and an **interpreter**. **[2]** *(AO1)*

7. *(from 1.2.1)* A **washing machine** and a **server cluster** use different types of operating system. Name the most suitable OS type for each and justify your choice. **[2]** *(AO2)*

8. *(from 1.1.3)* Explain the difference between **RAM** and **ROM** in terms of volatility and typical use. **[2]** *(AO1)*
