

Revision Game Cards — 1.5 Legal, Moral, Cultural & Ethical Issues

Print and cut along the borders. ✂ Loop cards: each player reads the bottom "Who has...?"; whoever holds the matching "I have..." reads it out, then their own clue — the chain visits every card and loops back to the start.

Loop cards (dominoes) — cut out & deal

1 / 14 I HAVE Data Protection Act 2018 / GDPR WHO HAS... The body that enforces UK data protection law and can issue large fines?	2 / 14 I HAVE The ICO (Information Commissioner's Office) WHO HAS... The principle that you must not keep personal data for longer than necessary?
3 / 14 I HAVE Storage limitation WHO HAS... The person an item of personal data is about?	4 / 14 I HAVE The data subject WHO HAS... The role of the organisation that decides why and how personal data is processed?
5 / 14 I HAVE The data controller WHO HAS... The 1990 Act that makes hacking and unauthorised access illegal?	6 / 14 I HAVE Computer Misuse Act 1990 WHO HAS... CMA Offence 1 - the basic offence of doing this without permission?

I HAVE

Unauthorised access

WHO HAS...

CMA Offence 3 - doing this to programs or data (e.g. ransomware)?

I HAVE

Unauthorised modification

WHO HAS...

The 1988 Act protecting original works, software, music and designs?

I HAVE

Copyright, Designs & Patents Act 1988

WHO HAS...

Unlike copyright, this protects an invention and must be applied for and granted?

I HAVE

A patent

WHO HAS...

Permission from a rights-holder allowing you to use their protected work?

I HAVE

A licence

WHO HAS...

The 2000 Act governing how public bodies may intercept communications?

I HAVE

RIPA 2000

WHO HAS...

The gap between those who have access to technology and skills and those who don't?

I HAVE

The digital divide

WHO HAS...

When an AI system reproduces or amplifies unfairness from its training data?

I HAVE

Algorithmic bias

WHO HAS...

The law covering how organisations collect, store and process personal data?

Taboo cards — describe the term without the banned words

Computer Misuse Act 1990

Don't say:

- hacking
- unauthorised
- access
- 1990

GDPR

Don't say:

- data
- personal
- Europe
- protection

Copyright

Don't say:

- copy
- music
- licence
- steal

Patent

Don't say:

- invention
- apply
- protect
- idea

RIPA 2000

Don't say:

- intercept
- communications
- police
- surveillance

Digital divide

Don't say:

- access
- gap
- internet
- poor

Automated decision-making

Don't say:

- computer
- decide
- human
- algorithm

E-waste

Don't say:

- rubbish
- environment
- recycle
- electronic

Card sort — scenario cards (sort under the headers)

SCENARIO

A firm sells its mailing list to advertisers without any lawful basis or consent.

SCENARIO

A games studio's source code is copied and released by a rival without permission.

SCENARIO

An employee uses a colleague's login to snoop on files but changes nothing.

SCENARIO

A police force intercepts a suspect's phone calls without the required authorisation.

SCENARIO

A user uploads pirated films to a streaming site for others to download.

SCENARIO

A hacker breaks into a server and deletes the company's records out of spite.

SCENARIO

A hospital leaves patient records on an unencrypted, publicly accessible drive.

SCENARIO

A criminal gains access to a network in order to plant spyware and steal banking logins.

SCENARIO

A company keeps job-applicant CVs indefinitely with no reason to retain them.

SCENARIO

Someone uses a band's song in a commercial advert without buying a licence.

Card sort — answer key (teacher)

Scenario	Correct category
A firm sells its mailing list to advertisers without any lawful basis or consent.	Data Protection Act
A games studio's source code is copied and released by a rival without permission.	Copyright Designs and Patents Act 1988
An employee uses a colleague's login to snoop on files but changes nothing.	Computer Misuse Act 1990
A police force intercepts a suspect's phone calls without the required authorisation.	RIPA 2000
A user uploads pirated films to a streaming site for others to download.	Copyright Designs and Patents Act 1988
A hacker breaks into a server and deletes the company's records out of spite.	Computer Misuse Act 1990
A hospital leaves patient records on an unencrypted, publicly accessible drive.	Data Protection Act
A criminal gains access to a network in order to plant spyware and steal banking logins.	Computer Misuse Act 1990
A company keeps job-applicant CVs indefinitely with no reason to retain them.	Data Protection Act
Someone uses a band's song in a commercial advert without buying a licence.	Copyright Designs and Patents Act 1988

Quick-fire — clue & answer (self-test / quiz-quiz-trade)

#	Clue	Answer
1	The Act about unauthorised access to computer systems.	Computer Misuse Act 1990
2	The Act about protecting original works, music and software.	Copyright, Designs & Patents Act 1988
3	The Act about how organisations handle personal data.	Data Protection Act 2018 / GDPR
4	The Act about public bodies intercepting communications.	RIPA 2000
5	CMA offence: releasing ransomware that encrypts files.	Offence 3 (unauthorised modification)
6	CMA offence: hacking a bank in order to steal money.	Offence 2 (access with intent)
7	CMA offence: using a friend's login to look around, changing nothing.	Offence 1 (unauthorised access)
8	The ethical issue: machines doing tasks once done by humans, risking job losses.	Automation / workforce displacement
9	The issue: the gap between those with and without tech access and skills.	Digital divide
10	The issue: AI reproducing unfairness from its training data.	AI / algorithmic bias
11	The environmental problem of discarded electronics and toxins.	E-waste
12	Unlike copyright, this protects an invention and must be applied for and granted.	A patent
