

Homework — 1.3.3 Networks

Name: _____ Date: _____ **Mark:** _____ / 20

OCR H446 — set after the 1.3.3 lesson. Show your working.

Part A — This week's topic (~14 marks)

1. State **two** differences between a **LAN** and a **WAN**. [2] (AO1)

2. Devices made by many different manufacturers communicate successfully across the internet. Explain why **standard protocols** are essential for this communication. [2] (AO1)

3. Explain how the **Domain Name System (DNS)** allows a user to reach a web server after typing a domain name into their browser. **[3]** (AO1/AO2)

4. A company sets up a **client-server** network instead of a peer-to-peer network. Give **two** advantages and **one** disadvantage of this choice. [3] (AO2)

5. A large video file is sent from a server to a home computer across the internet using **packet switching**. Describe how packet switching is used to deliver the file. [3] (AO1/AO2)

6. Describe what a **firewall** does to help protect a network. [1] (AO1)

Part B — Retrieval: keep it fresh (~6 marks)

7. (1.3.2) State what is meant by **referential integrity** in a relational database. [2] (AO1)

8. (1.3.1) State **two** properties that a good hash function should have. [2] (AO1)

9. (1.2.2) Explain **one** task carried out by a **linker** when an application is built. [2] (AO1)
